Arrow International's **Max Game Manager™** is a

BINGO EVENT PULL TAB MANAGEMENT SYSTEM

designed to engage players, add integrity to your games, speed up play, and increase your venue's revenue.

TAKE YOUR GAME to the MAX

Promote and verify bingo event pull tab games on a video
flashboard or any HDTVs throughout your hall or club with MGM!

PLAY+PROMOTE

Players know exactly what games are being played, what games are for sale, and even when it's "last call!"

ADD INTEGRITY

Visual verification allows game operators and all players to confirm that winning tickets are legitimate.

STAY UP-TO-DATE

Download new games directly to the MGM PC over the internet – no more manual software updates!

MGM's reporting system keeps track of game inventory, serial numbers, winning tickets, and much more – and it automatically backs up.

Verify games from any PC or tablet in your hall with MGM's **Remote Control** feature (optional MGM tablet available from Arrow).
